Education

KIT College of Engineering

B.Tech in Computer Science and Engineering (Data Science) — CGPA: 7.96

Sep 2023 – Present

Kolhapur, Maharashtra

Ichalkaranji High School & Jr. College, India

Class XII — Percentage: 63.17%

2023

India

Dadasaheb Magdum High School & Jr. college, India

Class X — Percentage: 90.40%

2021

India

Technical Skills

- **Languages :** Java, Python
- **Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs, JWT
- **Database:** MySQL, PostgreSQL, Prisma
- **AI/ML GenAI:** Machine Learning, Deep Learning, NLP, LLM, RAG, Hugging Face, EDA, Generative AI
- **Development & Platforms:** VS Code, Google Colab, Git, GitHub, Docker, Kubernetes, Helm, GitHub Actions, CI/CD, AWS (EC2, SQS, SES, S3, IAM, ECR)

Projects

SpeakUp – AI-Powered GD & Interview Practice Platform | *MERN Stack, ZEGOCLOUD, WebSockets, AI*

- Built a scalable MERN Stack platform with secure authentication, responsive UI, and high-performance backend.
- Integrated ZEGOCLOUD for real-time video/audio interviews and WebSockets for live chat interactions.
- Developed AI-based feedback for speech analysis, fluency, confidence, and communication improvement.
- Designed the platform to simulate real interview environments, helping users practice with confidence and improve performance.
- Enabled anytime-anywhere access with future scope for multilingual coaching and analytics.

EcoCart – Sustainable Shopping Assistant | *React.js, Firebase, Tailwind CSS, Google APIs, ML, DL*

- Led the integration of 8+ Google APIs and OpenStreetMap to build location-aware and intelligent shopping features.
- Implemented web scraping and OCR-based processing to collect and analyze product information.
- Implemented Progressive Web App (PWA) functionality to provide an Android-compatible shopping experience.
- Applied Machine Learning for data insights and developed an LSTM-based Deep Learning model for intelligent analysis.

SignLanguage Detection | *Python, CNN, Flask, OpenCV*

- Built a real-time Indian Sign Language recognition system using Convolutional Neural Networks (CNNs).
- Trained the model on a dataset of 36K+ images, achieving strong classification performance.
- Integrated the trained model with OpenCV to enable accurate real-time gesture detection through a webcam.
- Developed a Flask-based application to provide an accessible interface for real-time sign language recognition.

Achievements

- **Runner-Up – GDG Prabal Hackathon 2025 @ SGU, Kolhapur:** Built EcoCart, an AI-powered sustainable shopping assistant.
- **Winner – Project Based Learning (PBL) Competitions:** Recognized for developing and presenting innovative technical projects.

Extracurricular Activities

- **Volunteer – E-Cell (2023–24):** Assisted in organizing entrepreneurial workshops and student innovation events.
- **Volunteer – ISTE (2024–25):** Supported coordination of technical events and seminars for engineering students.
